Music Player :-

you can use the browse bottom to choose the directory of the .wav/.au file that you want to play then click play if you want to pause click on pause(only one click) if you want to replay double click pause same for mute as for stop and replay a single click is enough.

Colour Converter :-

After running the java file you will get a statement in the console asking you to press 1 or 2 -1 for converting from RGB to HSV and 2 for vice versa then press enter-you will be asked afterwards to enter the components of the given colour one by one (follow the statements in the console to know which component should be entered first).After entering the last component and pressing enter you will get your colour in the needed formate.
